

## NETGEAR's Smart Home Experience - Now Award Worthy!

[NETGEAR®, Inc.](#), one of the world's leading providers for networking devices, has recently had the honors of adding [CES® 2019 Innovation Awards Honoree](#) products to its resume. The award, from the largest gathering of innovative technologies CES®, celebrates breakthrough design and usability of brand new consumer technology, and was bestowed onto two separate Smart Home products in NETGEAR's newest line. The honorees include the Meural Generation 3.0 Smart Canvas as well as the Orbi Whole Home WiFi System With Built-In Cable Modem (CBK40).

Following their acquisition of Meural back in August of 2018, the Meural Generation 3.0 Smart Canvas is the first in its line to be produced solely by NETGEAR. The smart art-frame allows users to bring the art they desire from around the world into their home, with their library of over 30,000 art pieces from partnering museums, artists, etc. Control for the device is as easy as the wave of your hand, with a gesture control allowing users to simply wave their hand in front of the Smart Canvas and can browse through it's massive collection. Amazon's Alexa through the Amazon Echo can also be connected to further discover art to display and control the Canvas's settings. Users are even able to now showcase their own work, uploading images through the Meural app or website. The newest generation of Smart Canvas from NETGEAR comes in two different sizes for the first time, in a 27-inch and 21-inch frame. The Canvas also fashions approximately 8GB of storage, 2GB of RAM, and an updated Wi-Fi chip-set that will allow for higher performance and stability. The luxury of having beautiful art pieces in your home is now a reality with this award winning device.

The Orbi Whole Home WiFi System with Built-in Cable Modem (CBK40) aims to replace your router and cable modem and combine them together in one neat package. It delivers Internet with haste while creating a Mesh WiFi network for a super-quick and stable connection. It boasts that it create eliminate WiFi dead zones and buffering in a 4,000 square foot space. Set up is easy for users, with NETGEAR providing an easy-to-follow guide on their app, allowing them to immediately use and enjoy their internet as opposed to having to wait for a cable company to have to come out an install everything. The device is compatible with most major Internet carriers, including Xfinity from Comcast, Cox, and Spectrum. Gone are the days of leasing out multiple pieces of expensive equipment from your service providers, this device is the one-stop-shop that users have been looking for.

NETGEAR didn't stop there however, and have also recently announced the addition of three new products: Nighthawk® 5G Mobile Hotspot, Nighthawk® Cable Telephony modem for Xfinity® Voice, and the Armor™ Cybersecurity on Orbi. Will these devices live up to their award-winning cousins? Only time will tell, but users can easily look forward to testing out the newest line with their now proven track record for quality devices.
